CIV: Ranked prioritised order to implement PMC

Order at which to implement PMC in the country based on cost-effectiveness of the PMC delivery strategy.

CIV: Incremental cost-effectiveness ratios of implementing PMC co-delivery with EPI only vs No PMC in each admin-1 unit.

Incremental cost-effectiveness ratios of implementing PMC co-delivery with EPI only vs No PMC in each admin-1 unit. All costs used to calculate these exclude national-level start up costs.

CIV: Ranked prioritisation of options (page 1)

The first row indicates the single region and delivery model where PMC would be most cost-effective, meaning it would gain the most health (in disability-adjusted life-years) for the resources invested (public health service + donor costs of PMC and malaria treatment). The second row indicates the next-most cost-effective option to consider implementing alongside the first option, if additional implementation resources remain.
